

URGENT Impact (Institutional/National)

URGENT project implementation over the years had a very positive impact for SKUAST-K at the State/National level. The activities under URGENT could find a prominent position while highlighting achievements of the institute at Institutional/National level. The faculty and student exchange programs both overseas and within India have been highlights of SKUAST-K during the past few years. Besides the activities including International Workshops, International Lectures and Hosting Students under Student Exchange Program have put us in a confident position among all State/National Universities of India. This has also received quite a lot of attention and appreciation by the University administration and our major stakeholders. We are proud to have witnessed continuous improvement in our University rankings at national level, be it ICAR (Indian Council of Agricultural Research; NIRF (National Institutional Research Framework) with some contribution from activities under URGENT project. Recently in July 2024 the Faculty of Forestry has been accredited with A++ grade by the ICFRE (Indian Council of Forestry Research and Education) with a significant contribution and impact coming through the student and faculty related activities under URGENT Project. Besides, the enrolment of students at the Faculty of Forestry SKUAST-K also witnessed enhancement and diversity across different states of India in the past three years.
