The concluding points of the meeting were the following:

- URGENT is expected to bring a lot of added values to the operations of Khovd State University, and to create new synergies, in particular in such fields as e-learning, development of interactive curricula, practice-oriented curricula in life- and geosciences, and collaboration with stakeholders;
- The faculty of Khovd State University would appreciate training opportunities in the field of green and blue infrastructure, and in particular they would appreciate any options acquiring the best European practices, and if it would be possible to conduct such training in Mongolian;
- ICT staff of Khovd State University would appreciate training opportunities in the development and deployment of IT systems, in particular if this would be possible to arrange in Mongolian;
- New strategies for approaching stakeholder partners and for establishing with them sustainable cooperation are recognized as another important learning and capacity building opportunity brought by the project;
- In addition to knowledge exchange with EU partners, Khovd State University is looking forward to the engagement with URGENT Indian partners, as many green and blue infrastructure issues might be similar in Indian and Mongolian contexts.
