## ACKNOWLEDGMENTS

I would like to take this opportunity to express my heartfelt gratitude to the individuals who have played a significant role in the completion of my dissertation. Their unwavering guidance and support were valuable throughout this journey. I remember the kind words that kept me going while I felt miserable at the moments of self-doubt, and those who tried to remove the rocks I stumbled upon.

First and foremost, I extend my gratitude to my supervisor, Prof. P.K. Joshi sir, for his exceptional mentorship and expertise. His insightful guidance, constructive feedback, and support have been instrumental in my research. I am truly grateful for his unwavering support and patience.

I would also like to extend my appreciation to all the faculty members of the Special Center for Disaster Research, Jawaharlal Nehru University for their valuable insights, constructive feedback, and suggestions have immensely enriched my work. I am grateful for their time, expertise, and the rigorous evaluation they provided, which significantly enhanced the depth and rigor of my research.

Furthermore, I would like to acknowledge the support of my friends, and scholars at the School of Environmental Science (SES) lab, who have supported me throughout this endeavor. Their encouragement, discussions, feedback, and exchange of ideas have been invaluable in shaping my research and keeping me motivated during challenging times.

The equipment from the Sustainable Natural Resource Use in Arctic and High Mountains Areas (SUNRAISE) and Urban Resilience and Adaptation for India and Mongolia (URGENT) projects, co-funded by Erasmus+ Programme of the European are duly acknowledged.

I extend my deepest appreciation to DDMA officials of Wayanad district, elected representatives of Pozhuthana and Meppadi panchayats, and people of Puthumala, Kurchemala, Mukkilpeedika, and different locations of Wayanad district who participated in my research. Their willingness to contribute their time and experiences

has been invaluable in shaping the outcomes of my study. I express my love towards my parents who encouraged me wholeheartedly and stood behind me whole throughout this research and my little steps.

Thank you all for your unwavering support, guidance, and encouragement.

RAHMATH BEEVI K
