ACKNOWLEDGEMENT

Acknowledging the good that you already have in your life is the foundation for all abundance - Eckhart Tolle

Undertaking this M.Sc. dissertation has been truly a life-changing experience for me and it would not have been possible to do without the support and guidance that I received from many people.

I would like to take this opportunity to express my immense gratitude to my supervisor, Prof. P.K. Joshi, for his sincere and selfless support, and prompt and useful advice during my dissertation. He gave me eternal memory of benevolence, patience, diligence and erudition.

The equipment from the Sustainable Natural Resource Use in Arctic and High Mountains Areas (SUNRAISE) and Urban Resilience and Adaptation for India and Mongolia (URGENT) projects, co-funded by Erasmus+ Programme of the European Union are duly acknowledged.

I am grateful to Prof. Paul Rajmani, Dean of School of Environmental Sciences (SES) for providing the facilities of the school during my course work. I owe a debt of gratitude to all of the professors for guiding and imparting knowledge throughout the course. It was quite beneficial in assisting me in writing my dissertation.

Words cannot express my gratitude to Dr Susanta Mahato for his constant dedication to guiding me on every single step of the work. With his immense patience, encouragement and invaluable insight, I was able to complete my work with ease.

Special thanks to other members of the laboratory; Pradeep Kumar, Kundan Deval, Praveen Kumar, Jayshree Das, Manjul Pawar, Akshita Choudhary, Satish Kumar Singh and Ishwar Chand for their assistance and motivation. I would like to thank

Geetanjali Pukhrambam and Bhawna Yadav for their support and assistance throughout this journey.

I am grateful to my parents and brother for giving the love, care, encouragement and emotional support throughout my journey.

I can't thank enough my friends (Carolyn and Shivangi) for their constant social, moral and emotional support which kept me motivated to do work. Their constructive feedback helped me to grow as a person.

This journey made me a better version of myself and gave me new perspectives on academics as well as non-academics part of life. I will cherish it throughout my life.

Date: 20 June 2022
