

URGENT IMPACT

Co-funded by the
Erasmus+ Programme
of the European Union

In terms of my own experience, taking part in the URGENT PROJECT has been beneficial. Being able to engage with students from all around the world during the Pondicherry University summer school was an especially rewarding experience for me. My views have been widened by this exposure, which has also given me a forum to share ideas and absorb cultural knowledge, all of which will be extremely helpful for my future study projects. The program's talk on ecosystem services and disservices given by the Dr. Anton Shkaruba was one of the most interesting events; it was really educational and helped me to better grasp the topic. It was also a great experience to host the Pondicherry University's Doctoral students in Kashmir.

We had the honour of introducing them to our rich cultural heritage and showing them around several local locations, which strengthened the project's

collaborative spirit even more.
